DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. Group I: Claims 1-11;
- B. Group II: Claims 12-16;
- C. Group III: Claims 17-19; &
- D. Group IV: Claims 20-23.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Art Unit: 3749

- A. The inventions according to claims 1 to 11 relate to "a warming tool in a sheet form, which has an exothermic sheet manufactured so as to contain a metal (substance) capable of being oxidized, a water retaining agent and a fibrous material, and an air-permeable case for holding said sheet therein".
 - B. The inventions according to claims 12 to 16 relate to "an exothermic formed article in a sheet form which comprises an exothermic sheet containing a metal capable of being oxidized, a water retaining agent and a fibrous material and having a breaking length of 100 to 4000 m and laminated on one or both surfaces thereof, an air-permeable sheet or an air-un permeative sheet, and has a number of concave and convex portions formed by embossing on surface thereof".
 - C. The inventions according to claims 17 to 19 relate to "an exothermic sheet which comprises a formed article in a sheet form containing a metal capable of being oxidized, a water retaining agent and a fibrous material, having a breaking length of 100 to 4000 m and having a number of concave and convex portions formed by embossing on the surface thereof".
 - D. And, the inventions according to claims 20 to 23 relate to "an exothermic sheet which comprises one formed article containing a metal capable of being oxidized, a water retaining agent and a fibrous material and having a number of holes or cuts".
3. The following claim(s) are generic: No claims are generic.
4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:
- A. There is no technical relationship involving one or more of the same or corresponding special technical features among the inventions according to Group I: Claims 1 to 6, 7 to 9 and 10 to 11; Group II: Claims 12-16; Group III: Claims 17-19; & Group Iv: Claims 20-23.
5. A telephone call was made to Attorney Justine Wilbur of Oblon, Spivak, McClelland, Maier & Neustadt on 16 November 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
